Shane Strong Graphics

<http://sstrong.ca>

Welcome, You have downloaded a Texture package from sstrong.ca . I hope you enjoy its use.
Textured by Shane Strong

Hi all thank you for downloading my artwork here in the flightsim world I have been texturing since flightsim 2000.

All my work now is for FSX which can be bought at most computer game stores. I generally do Canadian Texturing that are real to life I thrive to get as close to real world counterparts as I can using pictures available to me.

All my textures I do by hand and I always add something to tell they are my own please respect my work and do not use it and claim it as your own I have put many hours into these if you want to use them email me and ask I would probably have no problem with it.

I hope you enjoy my aircraft and they couldn't be brought about to use for your enjoyment without the many model builders , Artists and animators out there in the Freeware and Payware world I would like to thank them.

Everyone has there hero's and inspiration people in this industry I would like to say thanks to mine:

They are:

Kamal Kerba

Frank(the one who realized my talent)

Andrew Richards

The Payne Brothers

Yannick Charland

Dee Waldron

Keith Clifford

Jason from CSI

The Mosher Brothers

And everyone needs close friends and I would like to thank mine :

Wayne Coyle

Al Sibley

Adam Bently

The whole Crew from CANUK and FlightOntario

Ralph Eisenegger

Steve Mosher

You can find my Website at: <http://sstrong.ca>

And my email: shane@sstrong.ca

All textures in this package and anything else done by myself is copy righted 2003-2009

Maple Leaf Imaging, sstrong.ca and Shane Strong

My textures are not to be sold they are completely freeware.

Add-ons are made available for the private use of Microsoft Flight Simulator enthusiasts.

Under no circumstances may any zip file be modified or sold for profit.

All packages downloaded from this site are the property of Shane Strong and can not be uploaded to any other site or sold on any media collection.

All packages will be uploaded here first and in a month I will place them on Avsim and flightsim.com and other sites.

Install instructions on text inside package
